

## INFORMATION BULLETIN

**BRAND** : OAKPACKER AMERICAN SINGLE MALT WHISKEY  
**DESCRIPTION** : OAKPACKER 750 ML – THE AIR EDITION

---

**AMERICAN SINGLE MALT 750 ML USA/70cl EU 46% ABV**

---

OAKPACKER, the "World's First Air Harvested Water Fused Whiskey," expresses gratitude to squirrels for their crucial role in growing oak trees, providing unique flavors through barrel wood. The brand name pays homage to these furry friends.

With an unwavering dedication to quality, OAKPACKER carefully sources the finest American single malt whiskeys that meet rigorous standards for taste, aroma, and complexity. Trust OAKPACKER for a meticulously crafted whiskey.

Recognizing water's vital importance in whiskey-making, OAKPACKER uses air-harvested water exclusively to maintain purity. This innovative technology collects pure, clean water directly from the atmosphere, reducing reliance on traditional sources and conserving precious resources.

This innovative air-harvesting process exemplifies OAKPACKER's commitment to crafting exceptional whiskey with minimal environmental impact. Respect for nature is a crucial philosophy throughout our business, from sourcing premium ingredients to employing eco-friendly technologies.

By choosing OAKPACKER whiskey, you enjoy a high-quality spirit and support a company dedicated to making a positive impact on the world.

### TASTING NOTES

**Nose:** Intensely aromatic with molten milk chocolate, spice-roasted pecans, candied ginger, marzipan, stewed prunes, carrot cake, hazelnuts, and allspice.

**Palate:** Mildly astringent, slightly thin mouthfeel. Explosive initial spice flavors, baked fruit, and Italian biscotti notes.

**Finish:** Warm notes of milk chocolate, toasted walnuts, fruit jam. Hints of oak. Complex, balanced spice, chocolate, and fruitiness.

---

### KEY SELLING POINTS

- 1- OAKPACKER is “**World’s First Air Harvested Water Fused Whiskey Brand**”
- 2- A new expression of American Single Malt Whiskey.
- 3- A new whiskey brand that uses innovative **Air-Harvesting Water** technology to cut the proof from cask to bottle. This technology enables to collect pure, clean water directly from the atmosphere while minimizing fresh water usage.
